# 1. RDA Vocabularies

These vocabularies are specific to RDA-related topics and registries, and are maintained by the RDA community. Not all of these are currently in use by the Knowledge Base, but can be added as needed. The vocabularies and registries in use by the Knowledge Base have links to the relevant resources.

#	List Item	Description
1	Plenary	A list of plenaries, with a reference to the host city
2	Event	Events supported and hosted by RDA
3	Event Types	Event types hosted by RDA
4	Working Groups	RDA Working Groups
5	Interest Groups	RDA Interest Groups
6	Communities of Practice	Communities of Practice in RDA
7	BoF	Birds of a Feather Sessions
8	Institution	Institutions associated with RDA
9	Institution Role	Roles of institutions within RDA
10	Individuals (Members)	List of members of RDA (qualified with ORCID, ... where available)
11	Individual Role	Roles of individuals in the
12	Organisational Bodies	RDA organisational bodies
13	Principles	Sets of principles that guide and inform RDA work
14	Adoption Status	Adoption status as reflected by the RDA workflow towards outputs and supporting materials
15	Stakeholders	A curated list of the typical stakeholders in the research data management landscape
16	Global and Regional Initiatives	These are funded to provide coordination, or to provide federated infrastructure guidance or platforms to the community.
17	Miscellaneous Keyword Vocabularies	RDA members and experts may want to indicate and use miscellaneous vocabularies as a source of keywords
18	Pathways	Implementation and adoption possibilities for RDA outputs
19	(Working) Group Status	Status of groups in RDA - based on a lookup list
20	(Working) Group Focus	One or more focus areas for working groups - possibly also interest groups
21	Managed Tag List	An open tag vocabulary that can be extended by any validated user. Includes RDA Tag Lists
22	Group Workflow	A controlled vocabulary from the RDA website that is used to colour-code groups with a basic workflow state
23	RDA Outputs	A definitive list of existing RDA outputs and support materials
24	Organisation Types	Organisations are classified in the RDA Website using one of these categories

## 2. Community and Domain Vocabularies

These vocabularies are frequently used by communities or specific domains. Not all of these are currently in use by the Knowledge Base, but can be added as needed.

#	List Item	Description
1	Researchers	Researchers are a subset of the membership of RDA, there is an overlap between researchers and members. The preferred source of registry entries is ORCID <sup>1</sup> .
2	Repositories	Repositories are listed based on re3data registry information. The preferred source of registry entries is re3data <sup>2</sup> .
3	Research Performing Organisations	Organisations that perform research, and are linked to RDA activity in one way or another. The preferred source of registry entries is ROR <sup>3</sup> .
4	Language	Standardised language references, obtained from ISO 639 <sup>4</sup> .
5	Criteria	Criteria Linked to Principles - e.g. FAIR principles or TRUST principles.
6	DataCite Lookup Lists	For purposes of publication, one should use DataCite controlled vocabularies for DataCite metadata <sup>5</sup> .
7	GORC	Links to Global Open Research Commons Elements and Features. GORC Vocabulary: Elements, Attributes, Features
8	Countries	A controlled vocabulary/ list of countries, based on ISO 3166 <sup>6</sup>

## 3. Group Vocabularies

Working Groups, Interest Groups, and other contributors of substantial content to the RDA Knowledge Base may want to define their own specialised vocabularies and code lists. This can be accommodated via TIGER support.
